3. Training Manual (TRAMAN), NAVEDTRA 10287-F

For page 3-29. See attached.

RECOMMENDATIONS FOR SHIP'S SERVICEMAN 1&C TRAINING MANUAL

1. Page 3-29-

Delete the negative sentence that starts, "Safety rules are mostly little things." in the first paragraph in the "Safety Precautions" section. Replace it with, "Safety is your most important duty as a supervisor."

Add the following at the end of the "Safety Precautions" section:

Many of the Naval Ships' Technical Manuals (NSTMs), manufacturer's technical manuals, and every planned Maintenance System (PMS) maintenance requirement card (MRC) include safety precautions. Additionally, OPNAVNIIST 5100.19B, Naval Occupational Safety and Health (NAVOSH) Program Manual for Forces Afloat, provide safety and occupational health information. The safety precautions are for your protection and to protect equipment.

During preventive and corrective maintenance, the procedures may call for personal protective equipment (PPE) such as goggles, gloves, hearing protection, and respirators. When specified, your use of PPE is mandatory. You must select PPE appropriate for the job since the equipment is manufactured and approved for different levels of protection.

If the procedure does not specify the PPE, and you aren't sure, ask your Safety Officer.

Most machinery, spaces, and tools requiring you to wear hearing protection are posted with hazardous noise signs or labels. Eye hazardous areas requiring you to wear goggles or safety glasses are also posted. In areas where corrosive chemicals are mixed or used, an emergency eye wash station must be installed.

All lubricating agents, oils, cleaning materials, chemicals used in maintenance and routine Ship's Servicemen work are hazardous materials. Hazardous materials require careful handling, storage, and disposal. PMS documentation provides hazard warnings or refers the maintenance man to the Hazardous Materials User's Guide (HMUG). Material Safety data Sheets (MSDSs) also provide safety precautions for hazardous materials. All commands are required to have an MSDS for each hazardous materials they have in their inventory. You must be familiar with the dangers associated with the hazardous materials you use in you work. Additional information is available from your commands's Hazardous Material/ Hazardous Waste Coordinator.

Workers must always consider electrical safety when working around any electrical or electronic machinery or equipment. Procedures normally include special precautions and tag-out requirements for electrical safety. You should review you command's electrical safety program instruction and procedures before beginning any work on electrical or electronic equipment or before working with portable electrical tools.
